The Commonwealth of Massachusetts

TRUSTEES' REPORT.

To His Excellency the Governor and the Honorable Council.

The Trustees of the Grafton State Hospital herewith submit the forty-fourth annual report, with the report of the superintendent and the treasurer appended.

It gives the Board of Trustees great pleasure to report that the vacancy, in the position of superintendent at the hospital, has been ably and satisfactorily filled by the appointment of Dr. Harlan L. Paine of Massachusetts as superintendent of the Grafton State Hospital. Dr. Paine, who was chief executive officer of the Boston Psychopathic Hospital, assumed charge at Grafton on Sept. 15, 1921.

During the short time that he has been in charge he has proven to be an energetic and efficient administrator.

A permanent water supply for the hospital is now under construction. It is hoped that by the end of another year an ample supply for all purposes will be available.

The hospital having inadequate fire protection, plans are under way to remedy this undesirable condition.

The vegetable cellar is practically completed, and is being used for the storage of vegetables harvested this year.

The employee situation is much improved.

A new interest has been awakened in the improvement of the wards, and many of the patients are working to beautify and adorn them. This interest and activity will be of great benefit to the patients, and will result in their surroundings being more attractive and homelike.

The Board wishes to again call to your attention the urgent need of a chapel and assembly hall at Grafton. An appropriation has been asked for this purpose annually since 1916, and

each succeeding year finds the need more imperative. The Board strongly urges, in view of the necessity of such an accommodation for the 1,500 patients now being cared for at the hospital, that the appropriation will be granted the coming year.

The ice and wind storm of the present week has been very disastrous to Grafton. The hospital has been without lights and without telephone service; wires and poles are down and a large number of trees are ruined.

We recommend the following appropriations for the coming year: —

Barn for hay storage	\$5,600 00
Barn for 60 cows, one wing (material, \$6,000; equipment, \$2,100)	8,100 00
Barn for hay storage (Oaks Group)	2,500 00
Sheds for farm tools and implements	3,500 00
Cottage for steward	5,000 00
Chapel and assembly hall	135,000 00
Sewerage connections, store house, power house, carpenter shop	2,400 00
Scales, 10-ton capacity	300 00
	<hr/>
	\$162,100 00

FRANK B. HALL.
 WINSLOW P. BURHOE.
 FRANCIS PRESCOTT.
 ERNEST L. ANDERSON.
 MARGARET A. CASHMAN.
 FLORA M. CANGIANO.
 ENOS H. BIGELOW.

SUPERINTENDENT'S REPORT.

To the Trustees of the Grafton State Hospital.

I herewith submit the forty-fourth annual report of the Grafton State Hospital for the year ending Nov. 30, 1921.

Appended to this report are the tables of statistics relative to patients for the year ending Sept. 30, 1921, and for your convenience a brief analysis of these tables is given, as follows: —

MOVEMENT OF THE POPULATION DURING THE YEAR.

At the beginning of the year there were 1,385 patients in the institution, 9 in family care under our supervision, 26 on visit, 33 on escape, making a total number of 1,453 on our books.

During the year 202 were admitted; 30 were discharged, 36 were transferred to other institutions, and 30 died, leaving at the end of the year 1,550 on our books, with 9 in family care.

The number of admissions exceeds the number admitted during the previous year by 122. The daily average number under our care and treatment was 1,486.76, exceeding by 9.13 the number for the previous year.

The number of patients received by transfer was 181, of which 78 came from Northampton, 93 from Westborough, 4 from Danvers, 2 from Bridgewater, 3 from Taunton and 1 from Medfield. Twenty-one were received from the community.

The average age of the patients admitted is 41.2 years.

Most of the cases transferred to us were suffering from dementia præcox in its various forms. Of those committed to us directly from the community practically all were suffering from epilepsy.

During the past month we have commenced to give intensive treatments with diarsenol to all cases which show positive

Wassermann. We have also purchased a large amount of laboratory equipment, and hope to have a clinical pathological laboratory before another year.

GENERAL HEALTH.

The general health of the hospital has been practically free from any contagious diseases. The following operations were performed during the year:—

Aspiration	1
Removal of part of bone of second phalanx	1
Removal of ovarian cyst	1
Laparotomy	1
Removal of necrosed bone from lower jaw	1

REPAIRS AND IMPROVEMENTS.

The concrete floor started in Elms C basement last year has been completed. A new toilet and lavatory in Oaks A have been installed with the necessary sewer connections.

The cow barn at the Oaks Group has been finished with asbestos wall board, and new ventilators installed. When the rotten sills are replaced it will be in good condition.

A new piggery 160 by 27 feet was completed November 28. This building is made of reinforced concrete, with air spaces in the walls. This piggery was very badly needed. It has, however, been found to be very cold and damp, due to the concrete floor, and it will be necessary to use a very large amount of shavings to keep it dry. It will also be necessary to install stoves to keep the place warm.

The incubators were changed from the basement of the grainery to the basement of the Oaks service building, making it possible to maintain a more uniform temperature and adding greatly to the convenience of caring for them.

The new road from the Oaks Group to the main highway was begun, and it is now open for traffic, and will probably be completed next year. It provides a shorter, level approach to this group.

A squash and onion room was built in the vegetable cellar this fall, ventilated trays being built which contain two

bushels each to care for the onions. Heat has been installed there, also a new floor in the second story, providing a large area for the storage of light materials.

The rough, unsightly area near the Elms Group is being leveled. This work has been done entirely by patients, and when completed will make a fine athletic field.

Hoods have been installed over kettles in the kitchen at the Elms service building.

One boiler has been retubed at the power house.

A new mangle was installed in the laundry, and a large disinfecter purchased.

A pasteurizing equipment has been installed, and it is now working satisfactorily.

Thirty thousand feet of lumber were cut during the year.

Elms C, Elms service building, Elms cottage, Oaks C and D buildings have been entirely painted during the year. At Pines C, Ward 1, the day hall and dormitory have been repainted. Elms B has been partially repainted. Practically all the buildings need repainting. The painters have cooperated well in training patients in their line of work.

STAFF CHANGES.

Dr. Buell L. Ashmore came in March, 1921, having had previous State hospital experience in the Monson State Hospital. He also served in the army.

The training school has been conducted under the direction of Mrs. Ena Benson. Nine pupils graduated in September.

THE HERD.

The herd was tested and found, with the exception of one or two animals, to react to the test for tuberculosis. The calves that have been born this fall have been kept in small packing-box houses, isolated, and fed on pasteurized milk, and every precaution taken to keep them from coming in contact with infectious material. It is hoped that these calves will be a nucleus for a non-tubercular herd.

THE FARM.

In spite of the drouth the crops did very well, and more vegetables were harvested than in any previous year. A new tractor was purchased.

A new road has been laid out to the Pines and Willows Groups and construction started on this. This will do away with the road that now goes over the hill at the Pines Group, since this road has two very dangerous corners.

DENTAL REPORT.

The dental work has been under the direction of Dr. Burton E. Loring of Worcester, who has spent one day each week at the hospital. We have purchased another dental chair and engine, and are planning to have a dental office in both the female and male departments. This, because of the distance between buildings, will enable the dentist to accomplish a great deal more than he is able to do at the present time.

The following is a report of the operations of the dentist during the past year. There is no question but what a full-time dentist could be used to advantage.

Roots extracted	242
Teeth extracted	128
Fillings	114
Cleanings	51
Treatments	26
Examinations	23
Plates made and repaired	13

One male patient was found to be suffering from necrosis of bone of the lower jaw. He was operated on by Dr. Samuel Woodward, visiting surgeon, and a portion of the bone of his jaw was removed.

REMARKS AND RECOMMENDATIONS.

There is need of a topographical survey before any construction work can be done in road planning, grading and in making tunnels for steam and for the use of patients. Our present sewer lines are a constant source of trouble; some

run on embankments built to support them, others have been found 15 feet below the surface covered with a rocky filling. Our longest line is said to have a drop of 1 inch every 500 feet.

Our patients, three times a day, must go to their dining rooms, out of doors, in all kinds of weather, and there is a constant menace that some will run away. It is almost impossible to find a patient in this wild country if they have a few minutes' start; this is especially true at night.

Our steam lines should be laid in proper tunnels. Several lines were installed only as temporary lines, one having served for years, although originally installed to dry plaster in the building. The steam line between Pines B and the power house was in very bad condition, and has been entirely replaced. It was even necessary to replace all of the Akron pipe which it was laid in.

There is great need of articles for ornamentation of the ward, there being very few pictures, rugs or curtains. Several hundred unframed pictures and engravings were purchased from a second-hand store for a small sum of money. We also purchased 5,000 feet of unfinished molding. From this material pictures are being made by patients.

There is a great need for electric blowers to rid our mangle room and kitchens from steam. The means originally provided are wholly inadequate, and it is impossible to see more than a few feet in our kitchens when the steam cookers are being used.

The wooden flooring over the bread ovens should be protected from fire, and new flues installed.

There is a great need of a new cow and horse barn at the Main Group. Ten thousand four hundred dollars were appropriated to build one wing of the cow barn last year, but was not used; an additional sum of \$13,700 is asked in order that a full-sized cow barn may be built.

On September 26 a neighbor's barn was burned, and it was found to have been set on fire by a patient, and that this patient was the cause of several fires in this vicinity during the past year. This patient has since been transferred to the Bridgewater State Hospital. As may be surmised, the attitude of the community toward the institution is very bad, and an effort is being made to change this.

The matter of parole for patients was checked, and all parole patients are supposed to be on their wards immediately following supper. Parole was withdrawn from patients considered not fit to have it, and the custom of turning patients loose at 4.30 in the morning to build fires for the various kitchens was stopped. The privilege of having matches was also withdrawn from all patients.

There was no proper place for housing bulls, so three houses with yards have been constructed, and each bull has a house and yard, and can be out of doors each pleasant day.

The unsightly building known as the old power house at the Elms Group should be torn down. It was found that the original pipes which go underneath the roof are used as part of the steam line to heat buildings, and it will cost \$1,200 to place these underground. This has been asked for in our budget, and it is planned to eventually tear this building down. The windows and doors were in very bad condition, and these have all been repaired by patient labor, and the building is now used as a garage.

At the present time the Oaks Group is depending on one 4-inch pipe for its entire water supply. This, while sufficient for domestic purposes, is entirely inadequate in case of fire. The hydrants were found to be very few in number, poorly placed and some were second-hand when purchased. Consequently I have had a study made of the situation, and plans have been drawn, and an amount of \$45,000 is asked for in order that our buildings will be properly protected. Because of the friction in this 4-inch pipe to the Oaks Group a stream of water there cannot be projected over 10 feet in the air.

There was no system of checking the various night watches. Two old clocks were found which were immediately put into use, and the various night watches now call the main telephone operator half hourly. The sum of \$1,500 is asked to provide suitable watch clock system for this purpose.

Many buildings were found to be inadequately provided with fire-fighting equipment. Sixteen hundred and eighty dollars and forty-two cents were found to be available from a previous appropriation for fire protection, and this has been spent for piping, connections, hose, valves and racks, so that

inside standpipes can be installed in Pines A and Pines C, also in Elms A.

A great deal of grading has been done in the vicinity of the administration building and the rear of Willows A.

Our laundry equipment is entirely inadequate, and new equipment to the value of \$8,915 is asked for in the budget.

Pines C and Elms A have never been adequately heated, and the sum of \$15,264 is asked for in order that our patients may be kept in comfort in these buildings.

An X-ray machine is very badly needed, and the sum of \$1,542 is asked for this purpose.

Greenhouses are needed, not only to keep our wards supplied with plants and flowers, but to enable us to start our early vegetables, and a sum of \$7,958 is asked for in the budget.

At two of our largest groups we have no way of grinding meats and vegetables, and the sum of \$282 is asked for to provide power grinders in our service buildings.

The sum of \$500 is asked for to provide compartment steamers for the Pines kitchen.

The sum of \$704 is asked for to provide street lights for the new road leading to the Oaks Group.

The sum of \$4,106.50 is asked for to provide guards at Pines C.

The sum of \$3,025.72 is asked for to provide guards at Pines D.

The sum of \$5,096.06 is asked for to provide a building to house our canning equipment.

The building known as Oaks A is in very bad condition. The foundation has sunk, and the concrete floor of the day hall is very irregular. The wooden partitions are rotted about the water sections; and it will be necessary to rebuild these. It is planned to replace all woodwork with cement construction.

We have over fifty buildings. Only a few of these are properly graded. Many of the rest will require fills of 10 to 20 feet in order to grade them. We badly need roads of proper construction, also shrubs, trees and plants to beautify our grounds.

Our water supply has always been entirely inadequate. Each year there has been certain periods when it has been necessary

to curtail the use of water. An appropriation of \$105,000 was made several years ago to provide additional water supply, and a determined effort has been made this fall to insure the installation of a supply this coming year. The city of Worcester has co-operated with us to the point of extending their mains. The road for the pipe has been surveyed, and engineers are working on specifications for the bids. It is now expected that the actual work of laying the pipe will be begun by April 15, 1922.

The ice storm of the last few days of November ruined hundreds of our fruit and shade trees and badly injured others. The ice weighed down our light and telephone wires so that all our buildings were without electricity and telephones.

I wish to express my appreciation of the loyal and faithful service rendered by the employees and officers, and the generous support, counsel and consideration extended to me, in behalf of the hospital, by your Board.

Respectfully submitted,

HARLAN L. PAINE, M.D.

TREASURER'S REPORT.

To the Department of Mental Diseases.

I respectfully submit the following report of the finances of this institution for the fiscal year ending Nov. 30, 1921:—

Water supply	Ch. 313, Acts 1917	\$105,000 00	\$63 14	\$7,578 15	\$97,421 85
Coal trestle and track scales ¹	Ch. 50, Res. 1918	10,000 00	2,540 07	9,532 27	467 73
Hydrotherapeutic equipment	Ch. 50, Res. 1918	6,000 00	5,482 22	5,482 22	517 78
Additional fire protection	Ch. 153, Acts 1919	6,000 00	640 92	4,960 50	1,039 50
Vegetable cellar	Ch. 211, Acts 1919	3,411 50	377 47	3,410 89	61*
Cow barn	Ch. 203, Acts 1921	10,400 00	—	—	10,400 00
		\$140,811 50	\$9,103 82	\$30,964 03	\$109,847 47

¹ Expended by Institution during year, \$2,788.47; less refund through Commission of Mental Diseases, \$248.40; total, \$2,540.07.

* Balance reverting to treasury of the Commonwealth	\$0 61
Balance carried to next year	109,846 86
Total as above	\$109,847 47

RESOURCES AND LIABILITIES.

Resources.

Cash on hand	\$7,704 38	
November cash vouchers (paid from advance money):		
Account of maintenance	27,295 62	
	<hr/>	\$35,000 00
Due from treasury of Commonwealth from available appropriation,		
account of November, 1921, schedule	22,556 55	
	<hr/>	\$57,556 55

Liabilities.

Outstanding schedules of current year:		
Schedule of November bills	\$57,556 55	
	<hr/>	\$57,556 55

PER CAPITA.

During the year the average number of inmates has been 1,446.98.
 Total cost for maintenance, \$512,642.14.
 Equal to a weekly per capita cost of \$6.8131.
 Receipt from sales, \$3,691.25.
 Equal to a weekly per capita of \$0.0490.
 All other institution receipts, \$16,105.78.
 Equal to a weekly per capita of \$0.2140.
 Net weekly per capita cost, \$6.5501.

Respectfully submitted,

SUSIE G. WARREN,
Treasurer.

Examined and found correct as compared with the records in the office of the Auditor of the Commonwealth.

ALONZO B. COOK,
Auditor.
